Retraction Note to: *Clin Transl Allergy* (2015) 5(Suppl3):P30 <https://doi.org/10.1186/2045-7022-5-S3-P30>

The authors have retracted this poster abstract [1] because of concerns regarding the validity of the post-hoc analysis presented here. An independent statistical analysis has found that the post-hoc analysis used a very small sample, which means the results are not generalizable to the original sample included in the trial. Conclusions based on results from this restricted sample are therefore unreliable. The effects seen are unlikely to be due to the active intervention and instead might be due to residual confounding related to age of weaning.

All authors agree to this retraction.
